

# Touristic fishing (Half day)

This activity can be performed both on Pico or/and Faial.

Includes a briefing on the historical context of Azorean fishing, description of the art or gear to be used, species target, location of the experience being unfolded as also addressing several themes related to Azorean fishing and sea life.

As referred to on the tourist fishing, with this service, it is essential to have physical and mental ability. Because if on one hand it requires an intrinsic minimum knowledge of sea fishing, it also requires a physical capacity that allows the experience to be carried out without risks to the crew and the equipment (boat, fishing rod, engine).

**Therefore, a good qualification of your experience and knowledge is necessary in order to allow a correct evaluation of where and what kind of fishing is to be carried out.**

Depending on the level chosen (Low, Medium, High) you can do different types of fishing. If you want to do a specific type of fishing or catch a certain type of fish, please do not forget to mention this in the activity description so that we can consider the possibility to capture it and prepare all the necessary material and logistics.

The fuel is not included in the price, as it will depend on the fishing area where the activity takes place. Therefore, depending on the fishing location, the price will be based on the consumption / distances table prepared by the company (Zone 1, zone 2, zone 3).

With the normal development of the activity, the responsibility for catching fish is not the responsibility of the company, being only responsible for the guarantee of the conditions so you can proceed to the possible capture whether you catch the fish or not.
